

## Dale Carr Sees Great Results With ProviPet

Vigortone Nutritionist Dale Carr has been pleased with the performance of his basset hounds on ProviPet.

*“We have been impressed with the **ProviPet Small Breed & Puppy Dog Food**. So far we have started two litters of pups on it when they reached four weeks of age. They go immediately to it and begin eating. They grow well and look good. Our female had ten pups her first litter and began losing body condition. We put her on ProviPet Small Breed & Puppy Dog Food to give her added energy. Her condition improved rapidly, and she produced plenty of milk for her large litter.”*
