

## Miller Labs Sees Big Improvement After Switching To ProviPet

Miller Labs of Quinter, Kansas, raise puppies for hunting, field trials, and pets. In the past, they had trouble with their dogs' hair coats being dull. Their trainers had suggested they switch to better dog food. When a litter of unhealthy pups was born and the vet couldn't find a problem, they decided to switch to the new ProviPet dog food offered by Vigortone.

According to Wayne Miller, they could see a big improvement almost immediately. The dogs are now healthier with bright and shiny coats. Their clients have remarked on how good their dogs look.

Miller Labs use both **ProviPet Adult Dog Food** and **Small Breed & Puppy Dog Food**.
